

Common conditions: Session 3 Worksheet

Session 3 has presented the key features of pressure mapping classically seen in common conditions of the foot and ankle.

In this worksheet, please look at the pressure information presented and answer the questions below:

1. What condition best describes the dysfunction/s of the L/foot?

2. What are the key reasons for your decision? (using mapping, CoP trajectory and PVT Graph features; (Remember the top graph relates to the L/foot)

3. What would the possible therapies your treatment strategy would include to address the components?
